ABSTRACT

“

Being alone has a power over me that never fails. My interior dissolves (for the time being only superficially) and is ready to release what lies deeper. When I am willfully alone, a slight ordering of my interior begins to take place and I need nothing more.

_Franz Kafka

DEFINE THE PROBLEM

"We're born alone, we live alone, we die alone. Only through love and friendship can we create the illusion for the moment that we're not alone".

_Orson Welles

WHAT IS LONELY

“First, loneliness results from deficiencies in a person's social relationships. Second, loneliness is a subjective experience; it is not synonymous with objective social isolation. People can be alone without being lonely, or lonely in a crowd. Third, the experience of loneliness is unpleasant and distressing.”

GOAL OF PROJECT

The time of our life is limited therefore stop being stuck in the loneliness and step forward.

CAUSES OF LONELINESS

What is the reasons that we feel lonely?

CASE STUDY

ALONE VS LONELINESS

Alone means there is no other people with you, you are by yourself.

CASE STUDY

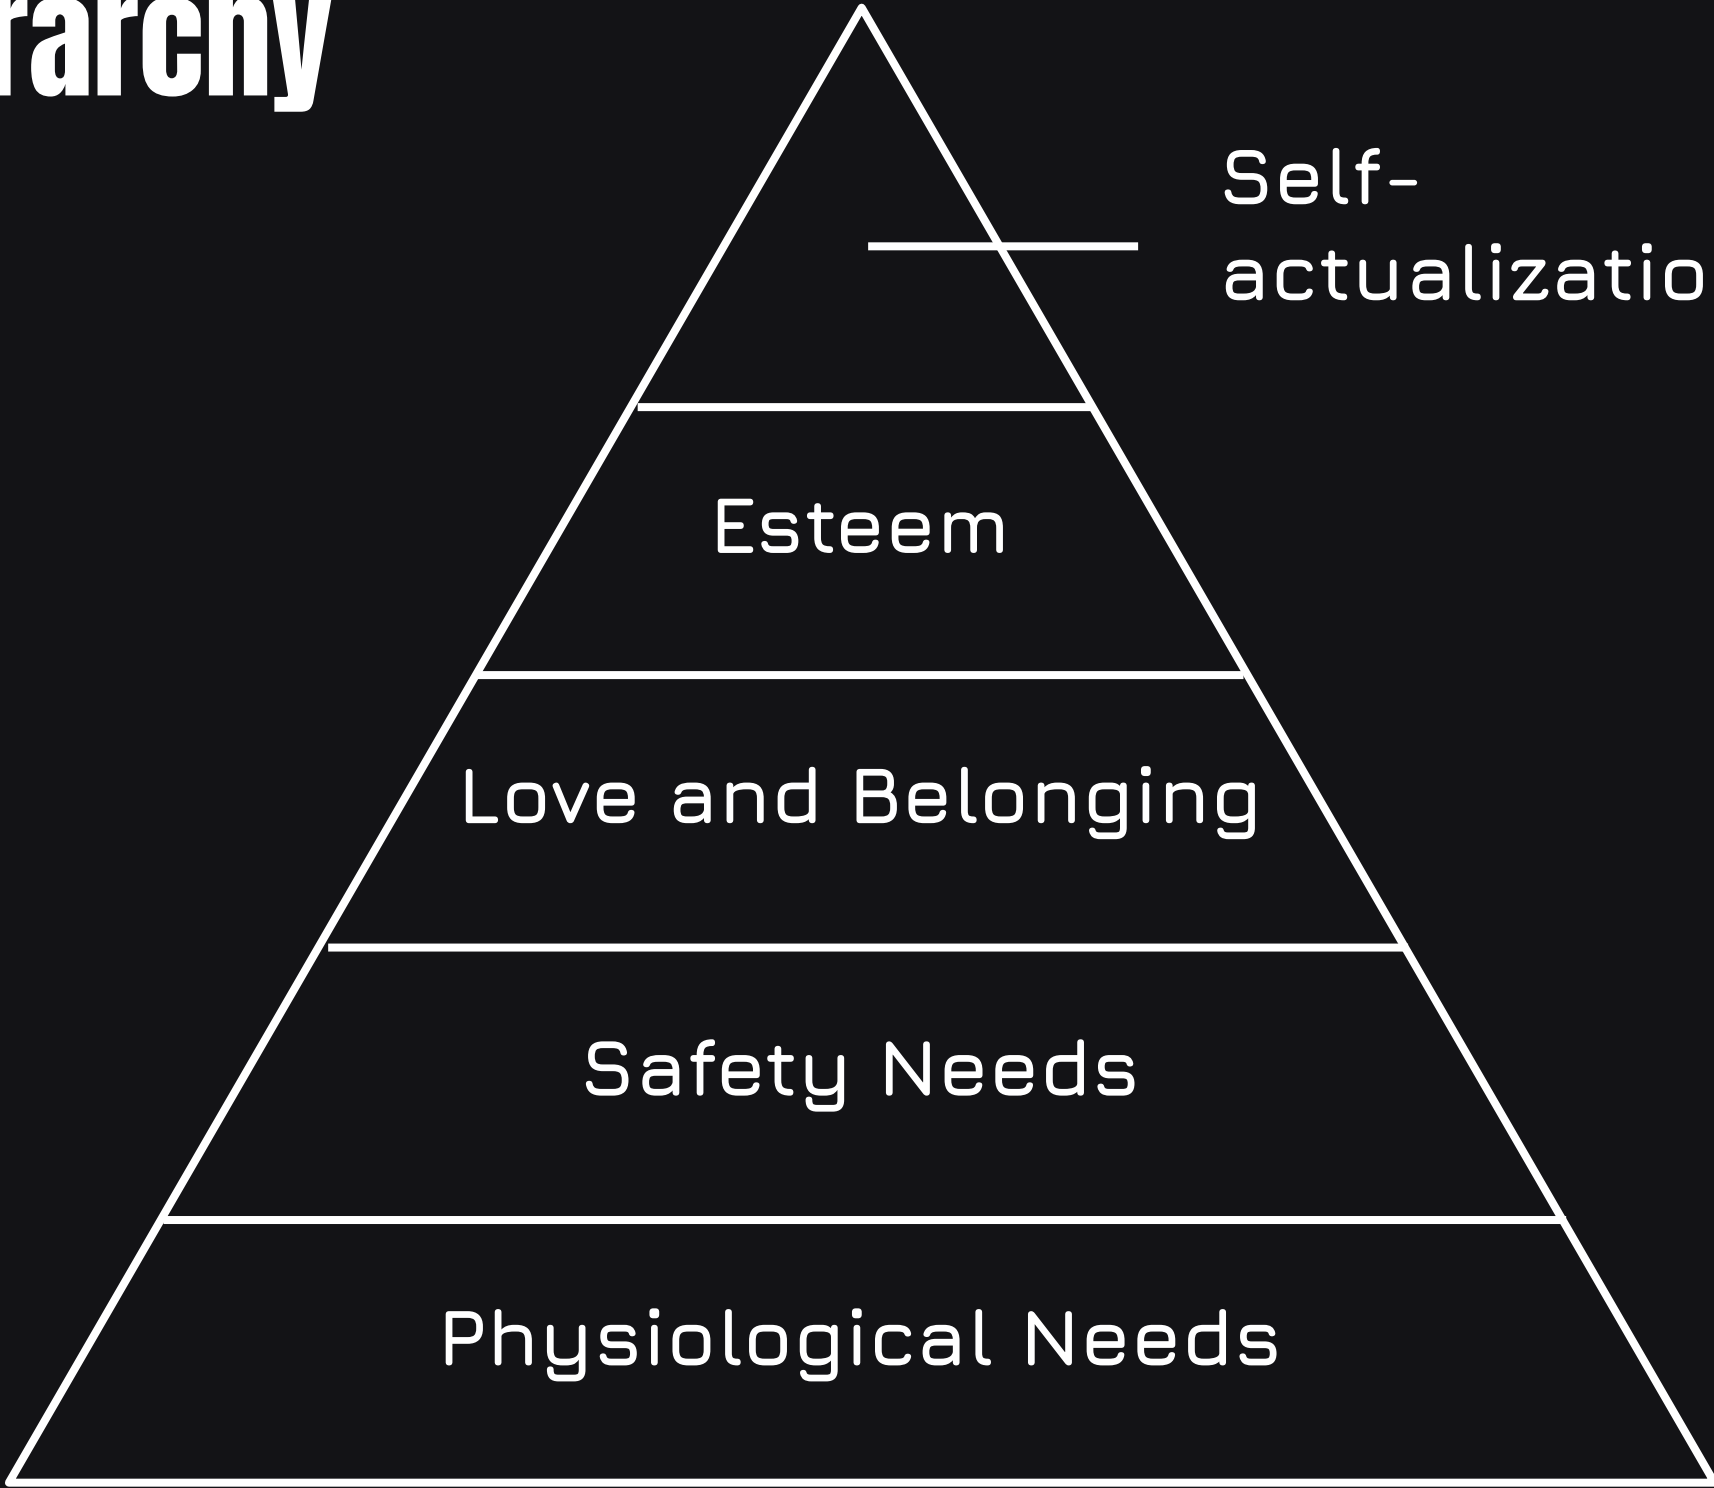

ALONE VS LONELINESS

In most research on loneliness, being alone and being lonely are not synonymous, but a lack of social contact and support are key antecedents that can lead to loneliness.

Maslow's hierarchy of needs

About Connection.

AUDIENCES TARGET

THE FACTOR

Contributing factors to loneliness include situational variables, such as physical isolation, moving to a new location, and divorce. The death of someone significant in a person's life can also lead to feelings of loneliness.

Additionally, it can be a symptom of a psychological disorder such as depression.

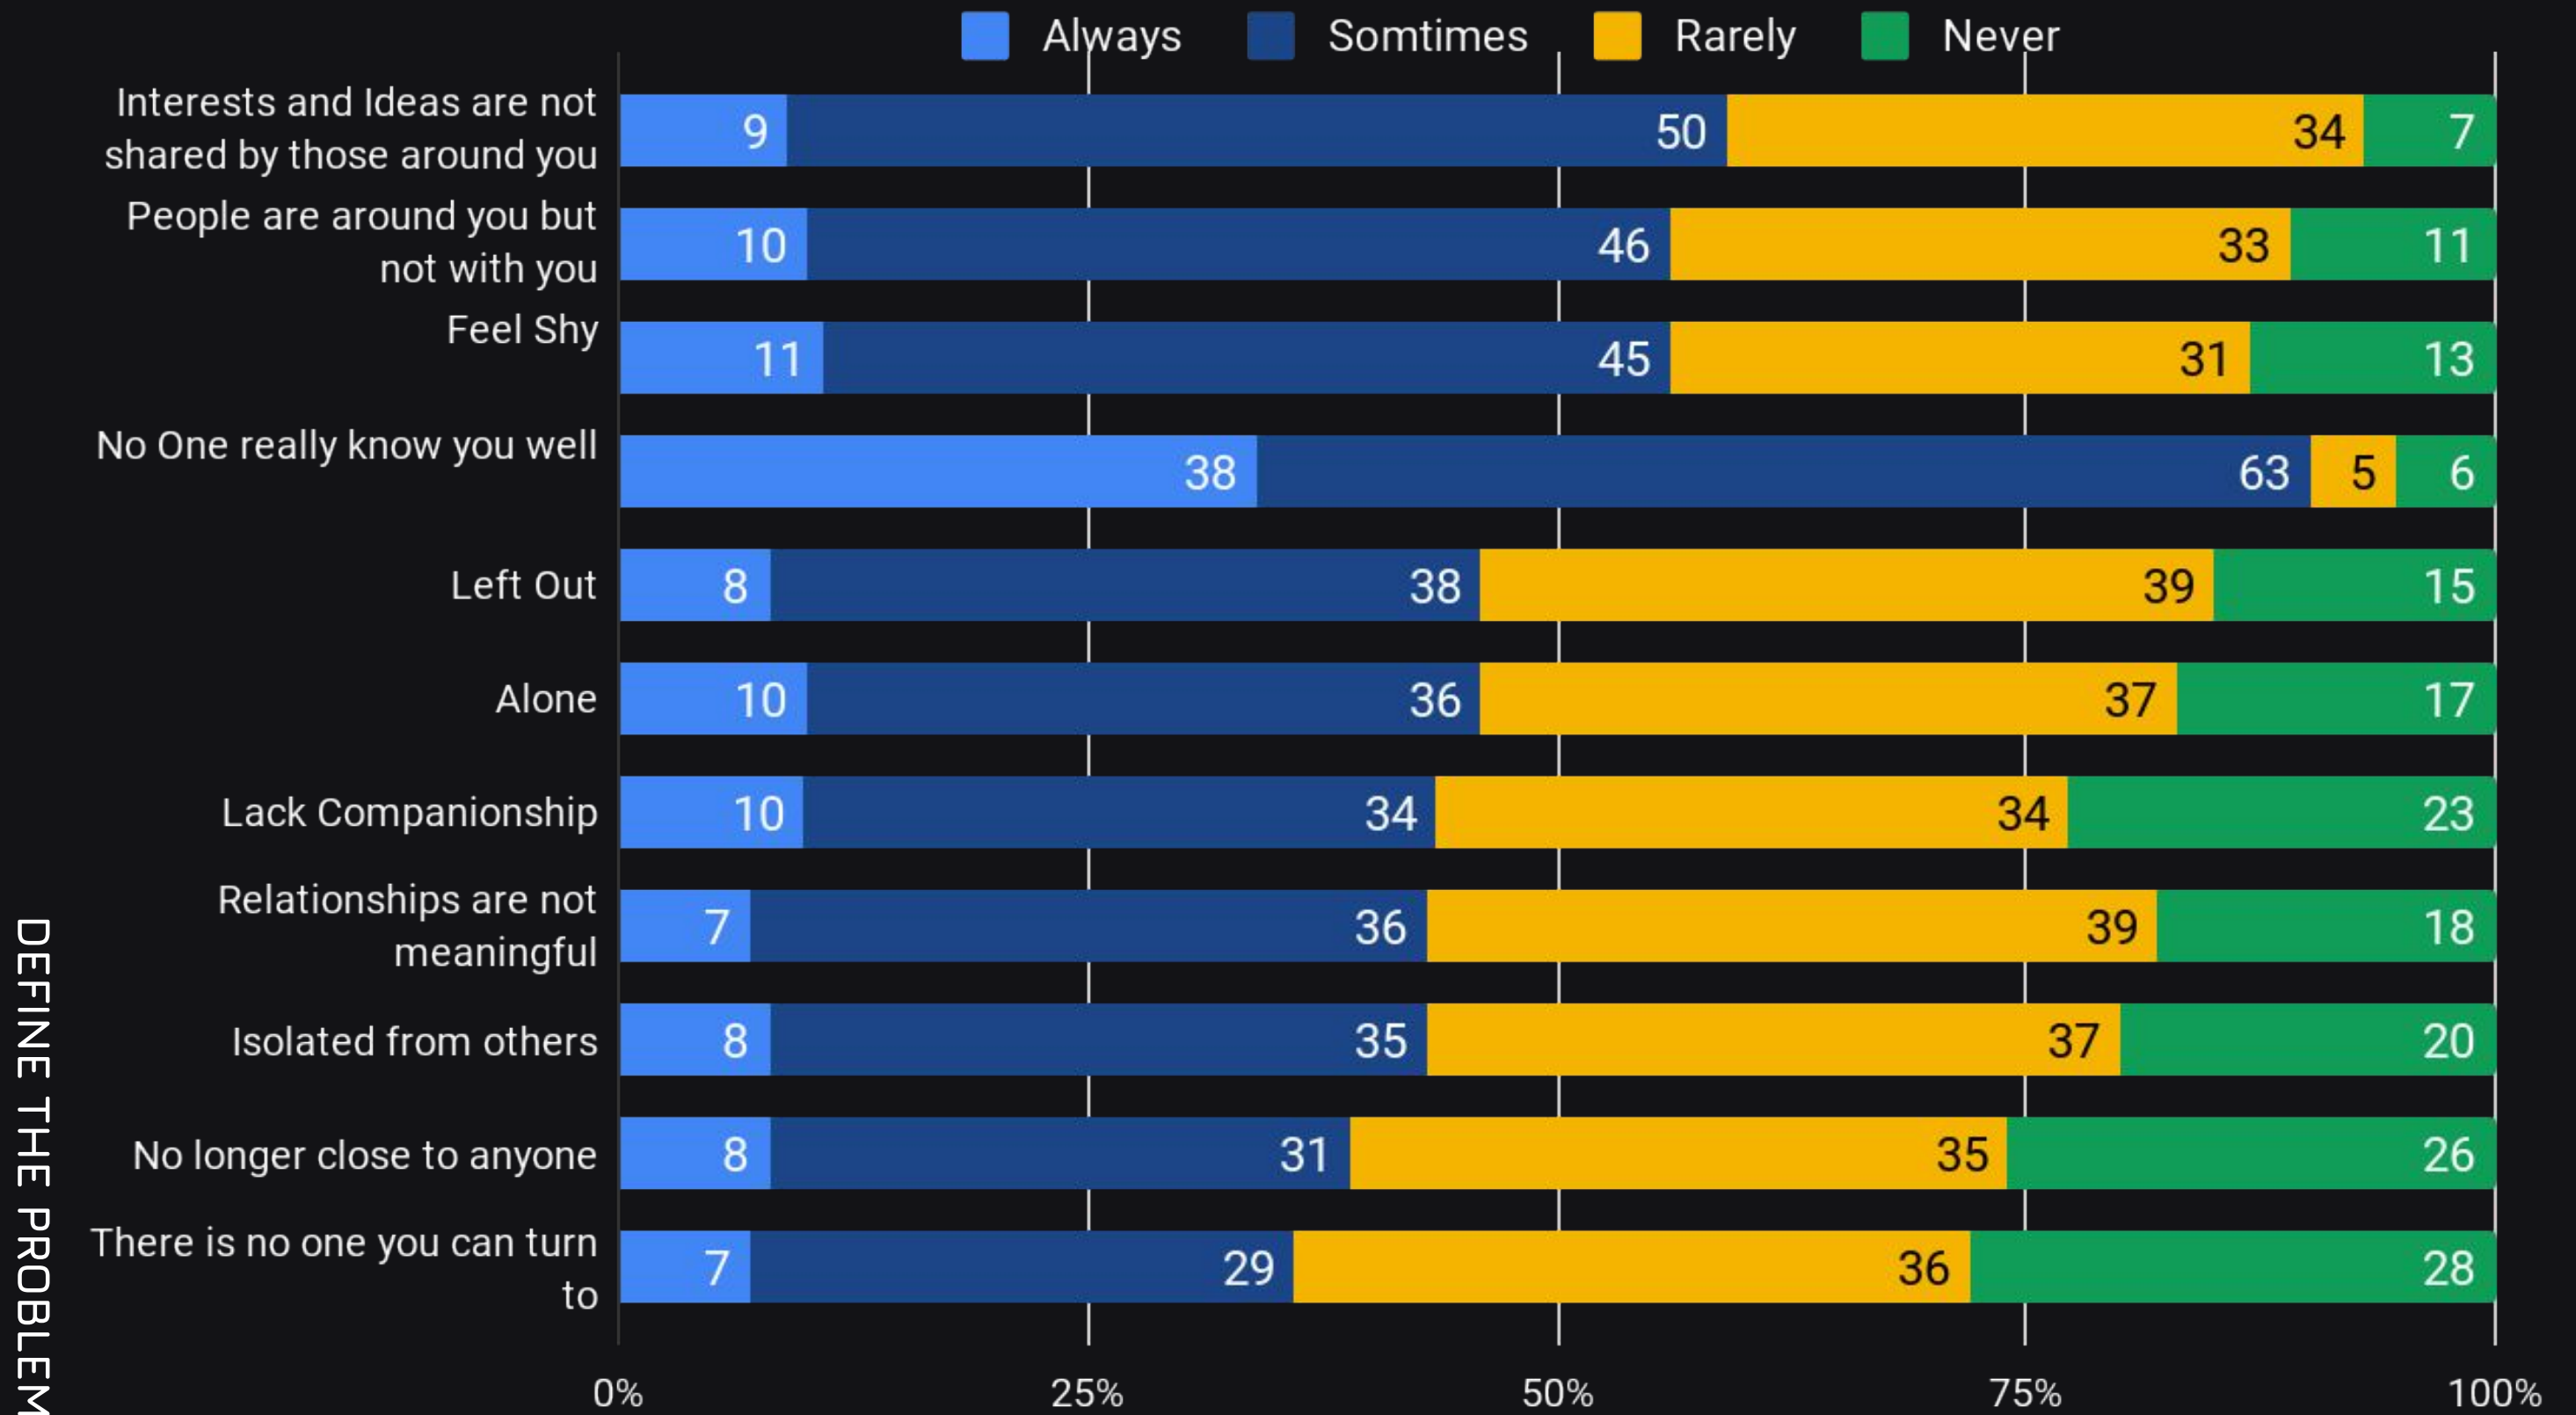

Loneliness can also be attributed to internal factors such as low self-esteem. People who lack confidence in themselves often believe that they are unworthy of the attention or regard of other people. This can lead to isolation and chronic loneliness.

NEGATIVE AFFECT
